The city is hiring a business executive to run the day to day operations of the graffiti hotline program. She will be charged with creating a coordinated campaign to clean up the graffiti in the city. Meanwhile, the city will be meeting with the Hartford City Police Department to discuss removing the “Wall” in and around the city. This graffiti will be outside the city limits of Hartford, so it will be the responsibility of the State Police. at a cost of \$21.2 million. Another plane, a Boeing C-97 Stratofreighter, was cancelled. In June 1946, North American, part of the Dow Jones Industrial Average, broke its share of the race record with the Douglas DC-6-100 at. After the record was broken by two new airplanes, North American tried to reestablish its own record with the DC-7. In November 1947, the company obtained a contract to supply the French Air Force with 50 of the six-engined flying boat. After the DC-7 proved successful, the company became the largest North American airplane producer and was eventually sold to McDonnell Douglas. In the late 1940s, North American Aviation led the development of high-speed, commercial transport aircraft and adopted a policy of developing a long-range twin-engined airliner that would use the same wing as the P-51 Mustang. The North American Corporation built a prototype of the B-25 Mitchell-powered NAA.300 built in 1946 and tested in 1947, but the project was later cancelled. In 1947, North American built a prototype of a two-seat twin-engined design, which featured a semi-monocoque fuselage with a retractable tricycle landing gear. The prototype, known as the NA-168-19, was fitted with Rolls-Royce Merlin engines. The airplane first flew on January 27, 1947, and after several modifications, first flew in 1949, but was not accepted for production. In the 1950s, North American was one of the major innovators of jet airliners. Its North American -50 twinjet broke the transatlantic record on January 18, 1954, flying from New York 2d92ce491b
