Maftoox Registry Cleaner is a small and easy to use application intended for clearing, correction of mistakes, check of integrity and Restoration of the registry. Registry Cleaner for Windows with improved Deep Scan goes further than ever before with new categories. You can safely clean and repair Windows registry problems with a few simple mouse clicks! Fix problems with the Windows registry that are a common cause of Windows crashes and error messages. With a few easy steps, Registry Mechanic will scan your entire registry for any invalid entries and provide a list of the errors found; you can then choose to selectively clean each item or automatically repair them all. For your convenience and Protection, Registry Cleaner can also make a backup of any repairs made so that you can easily recover any changes if required. Problems with the Windows registry are a common cause of Windows crashes, slow performance and error messages. By using a registry cleaner regularly and fixing registry errors your system should not only be more stable but it will also help improve your system performance without expensive hardware upgrades. Registry Cleaner uses a high-performance detection Algorithm to quickly identify missing and invalid references in your Windows registry. These problems can occur for many reasons including being left-behind after the un-installation or incorrect removal of software, by missing or corrupt hardware drivers, or orphaned startup programs. All components of the Registry will be analyzed with a detailed report of any problems found. These registry problems can be safely fixed with one click or even automatically corrected. With Registry Cleaner, you can maintain a stable Windows registry at no extra cost.
