Roblox is a virtual world created by participants using web browsers. Users create and build 3D games and virtual worlds for others to play within them, similar to Second Life. On the Roblox website, there are user-made games, a virtual in-game store called the Creators Studio, and a dashboard that allows developers to manage their games and content. Users can explore any game as a visitor, but have limited interactions with the game. For example, if a player visits a virtual house, they can step inside, but cannot interact with the house or its inhabitants, as their presence would break the illusion of the house and its world. As a player is interacting with a game, a roblox.com website is opened in a frame on their browser. Roblox uses a complex tracking system to identify players and their actions in games. If a player is determined to be inappropriate by Roblox staff, he or she may be blocked from the platform. In January 2010, the number of monthly active users hit 10 million. The platform continued to add users and expand its feature set over the next few years. Roblox reached 200 million active users by October 2012. By December 2014, the platform had achieved 500 million total registered users. The number of monthly active users reached 1.1 billion in April 2016. As of September 2016, about 650 million users visited the platform each month, with over 2.5 billion game sessions occurring each week. In March 2018, Roblox announced that 1.6 billion daily active users had been created on the platform during 2017. A new record of 1.7 billion daily active users was achieved in March 2019. Roblox's total user count surpassed 3 billion by August 2019, and its daily active users passed 6 billion that same month. Roblox is available on desktop web browsers (Google Chrome, Microsoft Edge, Firefox, Opera, Safari, and Internet Explorer) on all major operating systems (Windows, macOS, and Linux). It is also available in iOS, Android, and other mobile devices through Apple's App Store and Google Play. The Windows 10 and macOS versions have been officially available since September 2017 and May 2019, respectively. Roblox is also available on Nintendo Switch. Roblox has also announced plans to release an Oculus Rift version and a development kit version of Roblox Studio. A version for Microsoft HoloLens is not yet officially available. Roblox is free to play, with in-game purchases available through

I found a similar mod back in the 2016 that was amazing, but unfortunately that application stopped working.
